Sight Words

could then when were during

Lore and More went to many places during their visit to Beijing. First, they went to the zoo. When it stopped raining, they could see the pandas. They were happy at the zoo. Then, they went to other places. Finally, Lore and More went home.

Phonics Challenge

1. The tire is on fire because of the wire.
2. Are you sure we can measure the place in which I inquired?
3. My foot was sore because I tore the skin when I was picking up shells by the shore.
4. The crier left the pliers by the dryer.

Exploring Beijing

Lore and More arrive in Beijing.

It was a long trip. Lore and More were tired, but they were very excited to see their friends Blair and Clair.

They were also excited to see all of the places in Beijing that Blair and Clair had told them about.

The following day, everyone was excited as the taxi arrived in front of Clair and Blair's apartment.

Then they wanted to visit the zoo. The taxi traveled through underpasses and on overpasses.

It took them 20 minutes to get to the subway station!

Clair knew what to do at the subway station. She knew they would take line two to line four, get off the subway, and take a short walk to the zoo.

“Watch how I buy the tickets,” she said. “On the way home one of you can do it!” The children watched and learned. Then, they were on their way.

The children had a plan in case anyone got lost. They all would meet at the front entrance of the zoo.

The children had a great day at the zoo. No one got lost! They all had fun!

Comprehension Challenge

1. Where do Blair and Clair live?
2. How did they get to the subway station?
3. Which lines did they take to the zoo?
4. If anyone got lost, where would they meet?

Great job!

Simple Math

one year = _____ months

one decade = _____ years

one century = _____ years

Name Each Math Operation

$$12 \times 2 = 24$$

$$12 \div 4 = 3$$

Let's Solve the Problem

The Forbidden City in Beijing has been standing for five centuries, nine decades, and eight years until 2018. How old is the Forbidden City?

$$\underline{\quad} \times 100 = \underline{\quad}$$

$$\underline{\quad} \times 10 = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

It is years old.

Let's Solve the Problem

Beijing has been the capital of China since 1949.
How many decades and years has it been the capital of the country until this year?

_____ - 1949 = _____
_____ = _____ decades + _____ years

It has been the capital for _____ and _____.
