Lion Facts

Lions can run very fast. **Lions** eat zebras, giraffes, and sometimes even elephants.

Giraffe Facts

Giraffes eat leaves for food.

Giraffes are very tall with long necks. They use their long necks to eat leaves high up on the trees. **Giraffes** are the tallest animals in the world.

Elephant Facts

Two **elephants** are bathing in the lake.

Elephants are the biggest land animals on Earth.

They love playing in the water with their babies.

Elephants eat a lot of grass, fruit and leaves.

Zebra Facts

A **zebra** enjoys sleeping under the tree.

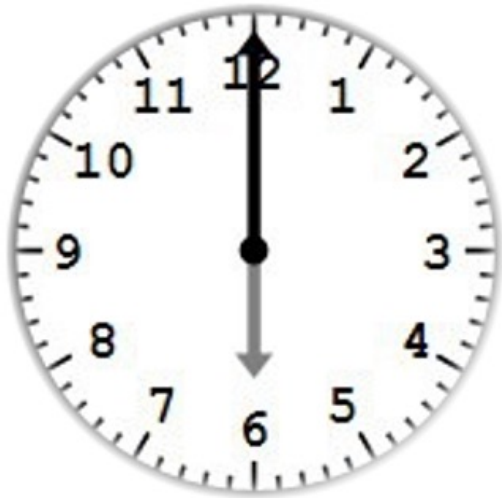

Zebras are members of the horse family. They have good hearing and eyesight. **Zebras** eat mostly grass. They find food and water on the plains.

Pre-Reading

A yellow cartoon cat with a blue flower on its head and a purple cartoon creature are sitting on the edge of a cliff, reading a large blue book together. The background is a savanna landscape with green grass, yellow paths, and brown hills under a blue sky.

What animals do you think we will find on the plain?

Animals on the Plain

The plain was home for many animals. At six o'clock in the morning, the **zebras** ate grass on the plain, the **giraffes** ate their leaves, and the elephants drank water.

Animals on the Plain

Oh no! A **lion** suddenly ran out and ate the zebra. The giraffe and the **elephant** were very scared, so they both ran away.

That evening, the animals came back and started to talk. “What were you doing when the lion ate the zebra?” the elephant asked the giraffe.

Animals on the Plain

The giraffe said, "I was eating leaves. What about you?"

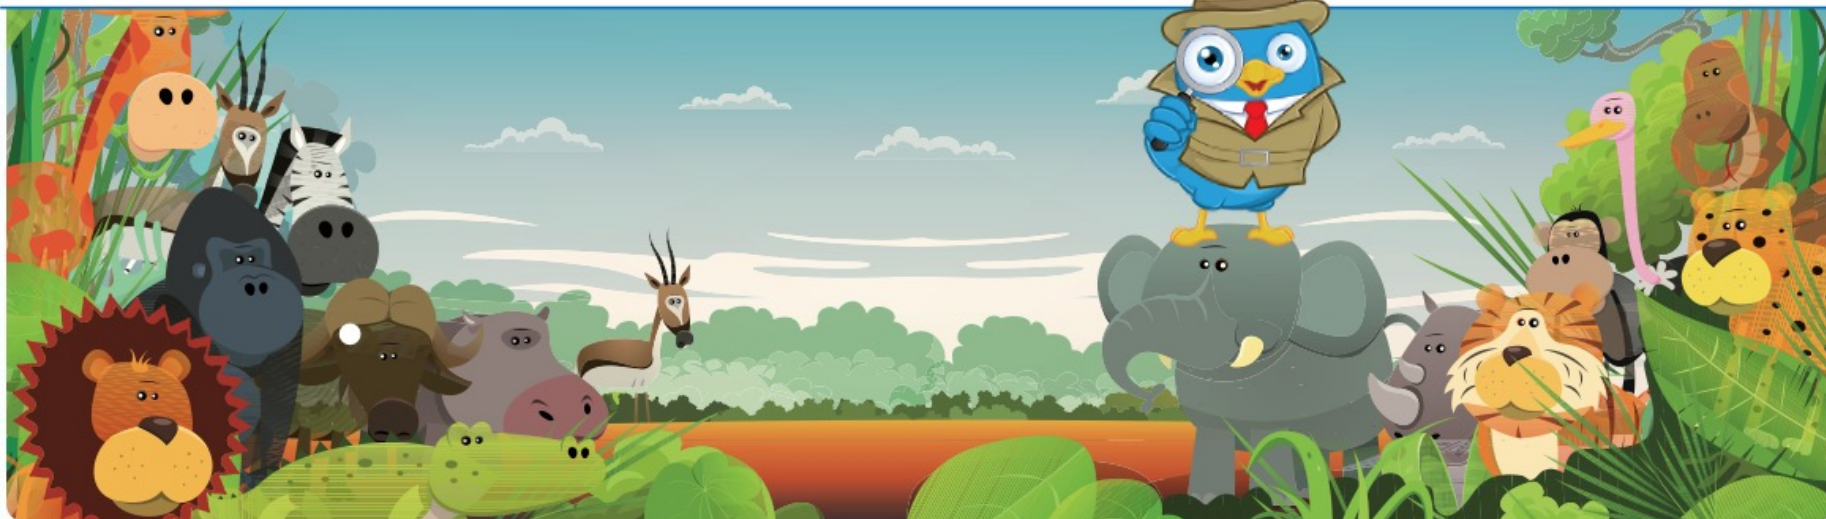

The elephant said, "I was drinking water. I did not see the lion running toward us."
