Deer Facts

There are many different types of **deer** found all over the world. **Deer** travel in groups called herds, like zebras. **Deer** eat grass, like zebras.

Gorilla Facts

Gorillas are very big animals that are found in the mountains of Central Africa. They like to eat mostly fruits and leaves. A **gorilla** can weigh up to 485 pounds and live for 35 to 40 years.

Pre-Reading

Do you know of any animals that live on mountains?

A Day in the Mountains

It was early in the morning. The animals were waking up in the mountains. The mountains are their habitat.

A big grizzly **bear** and her two babies were walking down to the river.

They had been sleeping in their cave all night. The babies were playing in the water and catching fish.

A Day in the Mountains

A brown **deer** was running around and eating grass.

The **gorillas** were waking up early in the mountains. They were climbing down from the trees.

Many gorillas were hungry and looking for food. The mountain gorillas were eating fruit for lunch. Animals in the mountains were looking for food.
