What animals from the plain can you remember?

Animals on the Plain

Explain

One morning, a lion was walking on the plain. He was going hunting. He saw an elephant and a zebra.

"What a great meal these two would be," he thought.

The elephant did not see the lion. She was using her big trunk to put the grass into her mouth. The zebra was also eating grass next to the elephant when he heard the lion coming.

Animals on the Plain

Explain

“Hurry, run away!” said the zebra.
“Why?” asked the elephant.
“Because the lion is coming to eat us,” said the zebra. The lion was running to catch the zebra, but the zebra was running very fast.

The elephant was very scared and kept running until she found some big rocks to hide behind.

Animals on the Plain

Explain

While the elephant was hiding, she fell asleep. A little later, the elephant woke up screaming. She started to cry because she thought the lion ate her trunk and her big ears.

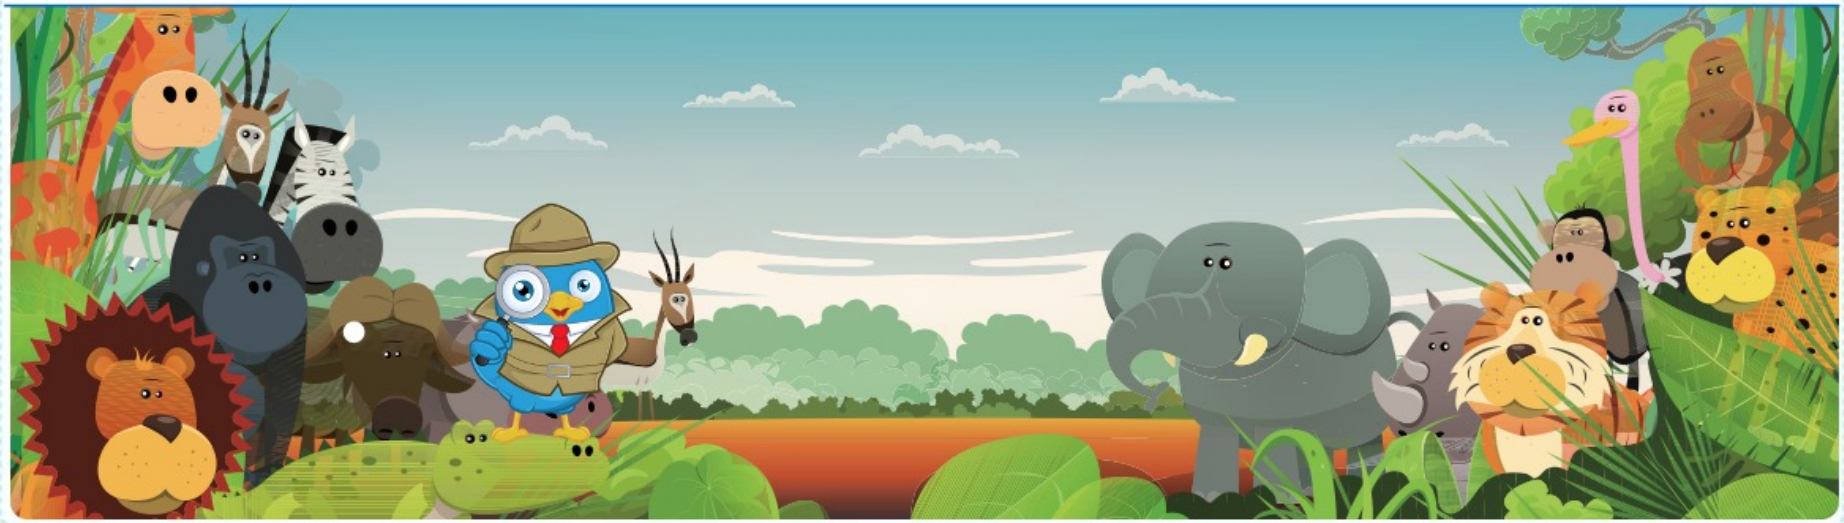
She was looking for her trunk and her big ears. She was very happy when she found her trunk and ears on her head. “What a bad dream!” thought the elephant.

Reader Detective

Explore

1. Why was the elephant happy at the end of the story?

2. Which animal from the plain is your favorite?



Was or Were

Extend

Remember: one animal-was
more than one animal-were

The animals _____ looking for food.

A giraffe _____ eating leaves high up on the trees.

Two zebras _____ eating grass on the plain.

An elephant _____ playing in the water.

The big bear and baby bears _____ catching fish.
