# Free Talk

Some animals live on plains, and some animals live in the mountains.  
Name some animals that live in the mountains.

# Free Talk

These animals live in the desert. Can you name them?

# Sea Animals

**aquatic animals** - animals that can only live in the water

This dolphin is swimming in a pool. It is an **aquatic animal**.

This shark is ready to hunt for food. It is an **aquatic animal** too.

# Vocabulary

A **shark** is swimming in the deep ocean.

**Sharks** are a type of fish that live in the sea or ocean. They are very strong. They have fins to help them move fast in the water.

# Vocabulary

A couple of **dolphins** are jumping out of the sea.

**Dolphins** are mammals that breathe air like we do. They swim quickly using their strong tails. They love playing in the water.

# Pre-Reading

What do you think  
sea animals eat?

# Animals in the Sea

Oceans and seas are home to many animals, such as these **dolphins**.

Dolphins do not drink water like we do because most of the water they swim in is salt water. Yuck! Instead, dolphins get all of the water they need from the fish they eat.

# Animals in the Sea

Yesterday morning, some dolphins saw a **shark** in the sea. The dolphins were swimming fast to catch small fish as the shark was hunting for food to eat. The shark did not see them, so the dolphins were very happy and started to play in the water.

Sharks live in the sea too. Sharks are fish, but they are different from some of the other fish. They do not have bones. They eat fish.

# Reader Detective

- 1 Do dolphins drink the salt water they swim in?
- 2 Would you like to be a shark or a dolphin?

# What am I ?
