Q

On which side does a tiger have the most stripes?

The outside!

A

Tigers are big and beautiful animals. They are strong and powerful, too. Tigers are the biggest cats in the world.

Bengal Tiger

A Tiger's Home

公众号: Mecanran

Tigers live in the forest. They spend a lot of time in the water, too. They live in hot places like Indonesia. They live in cold places like Russia.

Indochinese Tiger

Siberian Tiger

Tigers that live in cold places are bigger than other tigers. They also have thicker fur to keep them warm.

Built for Hunting

: Wecancan

Q

What do you get when you cross a tiger with a sheep?

A striped sweater!

A

Tigers are fierce hunters. Their bodies are built for catching prey.

Coat

A tiger's stripes camouflage it in tall grass and dry leaves. Its prey may not see the tiger until it's too late.

Teeth

Four large teeth help tigers kill prey quickly.

Eyes

A tiger's terrific eyesight helps it hunt at night.

Paws

Big paws with soft pads help a tiger walk quietly. Sharp claws hook into prey and don't let go.

Tail

A long tail helps a tiger keep its balance when moving quickly.

Back legs

Big muscles help a tiger dash or leap at its prey.

Tiger Term

CAMOUFLAGE: An animal's natural color or form that blends in with what is around it

PREY: An animal that is eaten by another animal

Meat Eater

Tigers are carnivores, animals that eat meat. Their favorite foods are large, hooved animals such as buffalo, deer, and wild pigs.

A hungry tiger can chow down 80 pounds of meat in one meal. That's about 320 hamburgers!

Tiger Turf

Besides hunting, tigers spend a lot of time marking their territory. They are not good at sharing!

Tigers make long scratch marks on trees. They also rub their faces on trees and leave smelly scents. This tells other tigers to stay away.

Tiger Term

TERRITORY: An area that an animal protects from other animals

Siberian Tiger

Cool Cat Facts

公众号：Wecan

Check out these neat facts about tigers.

No two tigers have exactly the same stripes.

Tigers can live in temperatures as low as -40 degrees Fahrenheit.

Tigers are great swimmers. They are never far from water.

Whiskers help a tiger feel its way in the dark.

A tiger's front teeth are three inches long.

Large paws keep Siberian tigers from sinking in deep snow.

Tigers have much better hearing than humans.

Cubs

公众号: Wecancan

A female tiger usually has two or three cubs at one time. The cubs weigh about four pounds at birth.

The mother raises the cubs by herself. Male and female tigers come together only to have cubs. Otherwise, adult tigers live alone.

Bengal Tiger

Q

What does a tiger say when it meets other animals?

A

“Pleased to eat you!”

A mother Bengal tiger nurses her young.

The cubs drink their mother's milk. After three or four months, they start to eat meat.

Tiger cubs play games. They chase, leap, and pounce. They are learning how to be good hunters. When they are two years old, young tigers leave their family to find their own territories.

Tiger Talents

公众号：Wecancan

Tigers are full-grown when they leave their families. They are big, heavy cats, but they can climb trees and jump great distances.

In fact, tigers can leap as far as 30 feet. That's as long as five adult men lying head to toe!

And, unlike house cats, tigers are good swimmers. They like to cool off in rivers and pools.

Bengal Tiger

Sumatran Tiger

The White Tiger

The white Bengal tiger is very rare. It can't grow orange fur. Its white coat, brown stripes, and icy blue eyes are quite a sight.

You won't find a white Bengal tiger in the wild. But you might be able to see one in a zoo.

Q

What's striped and bouncy?

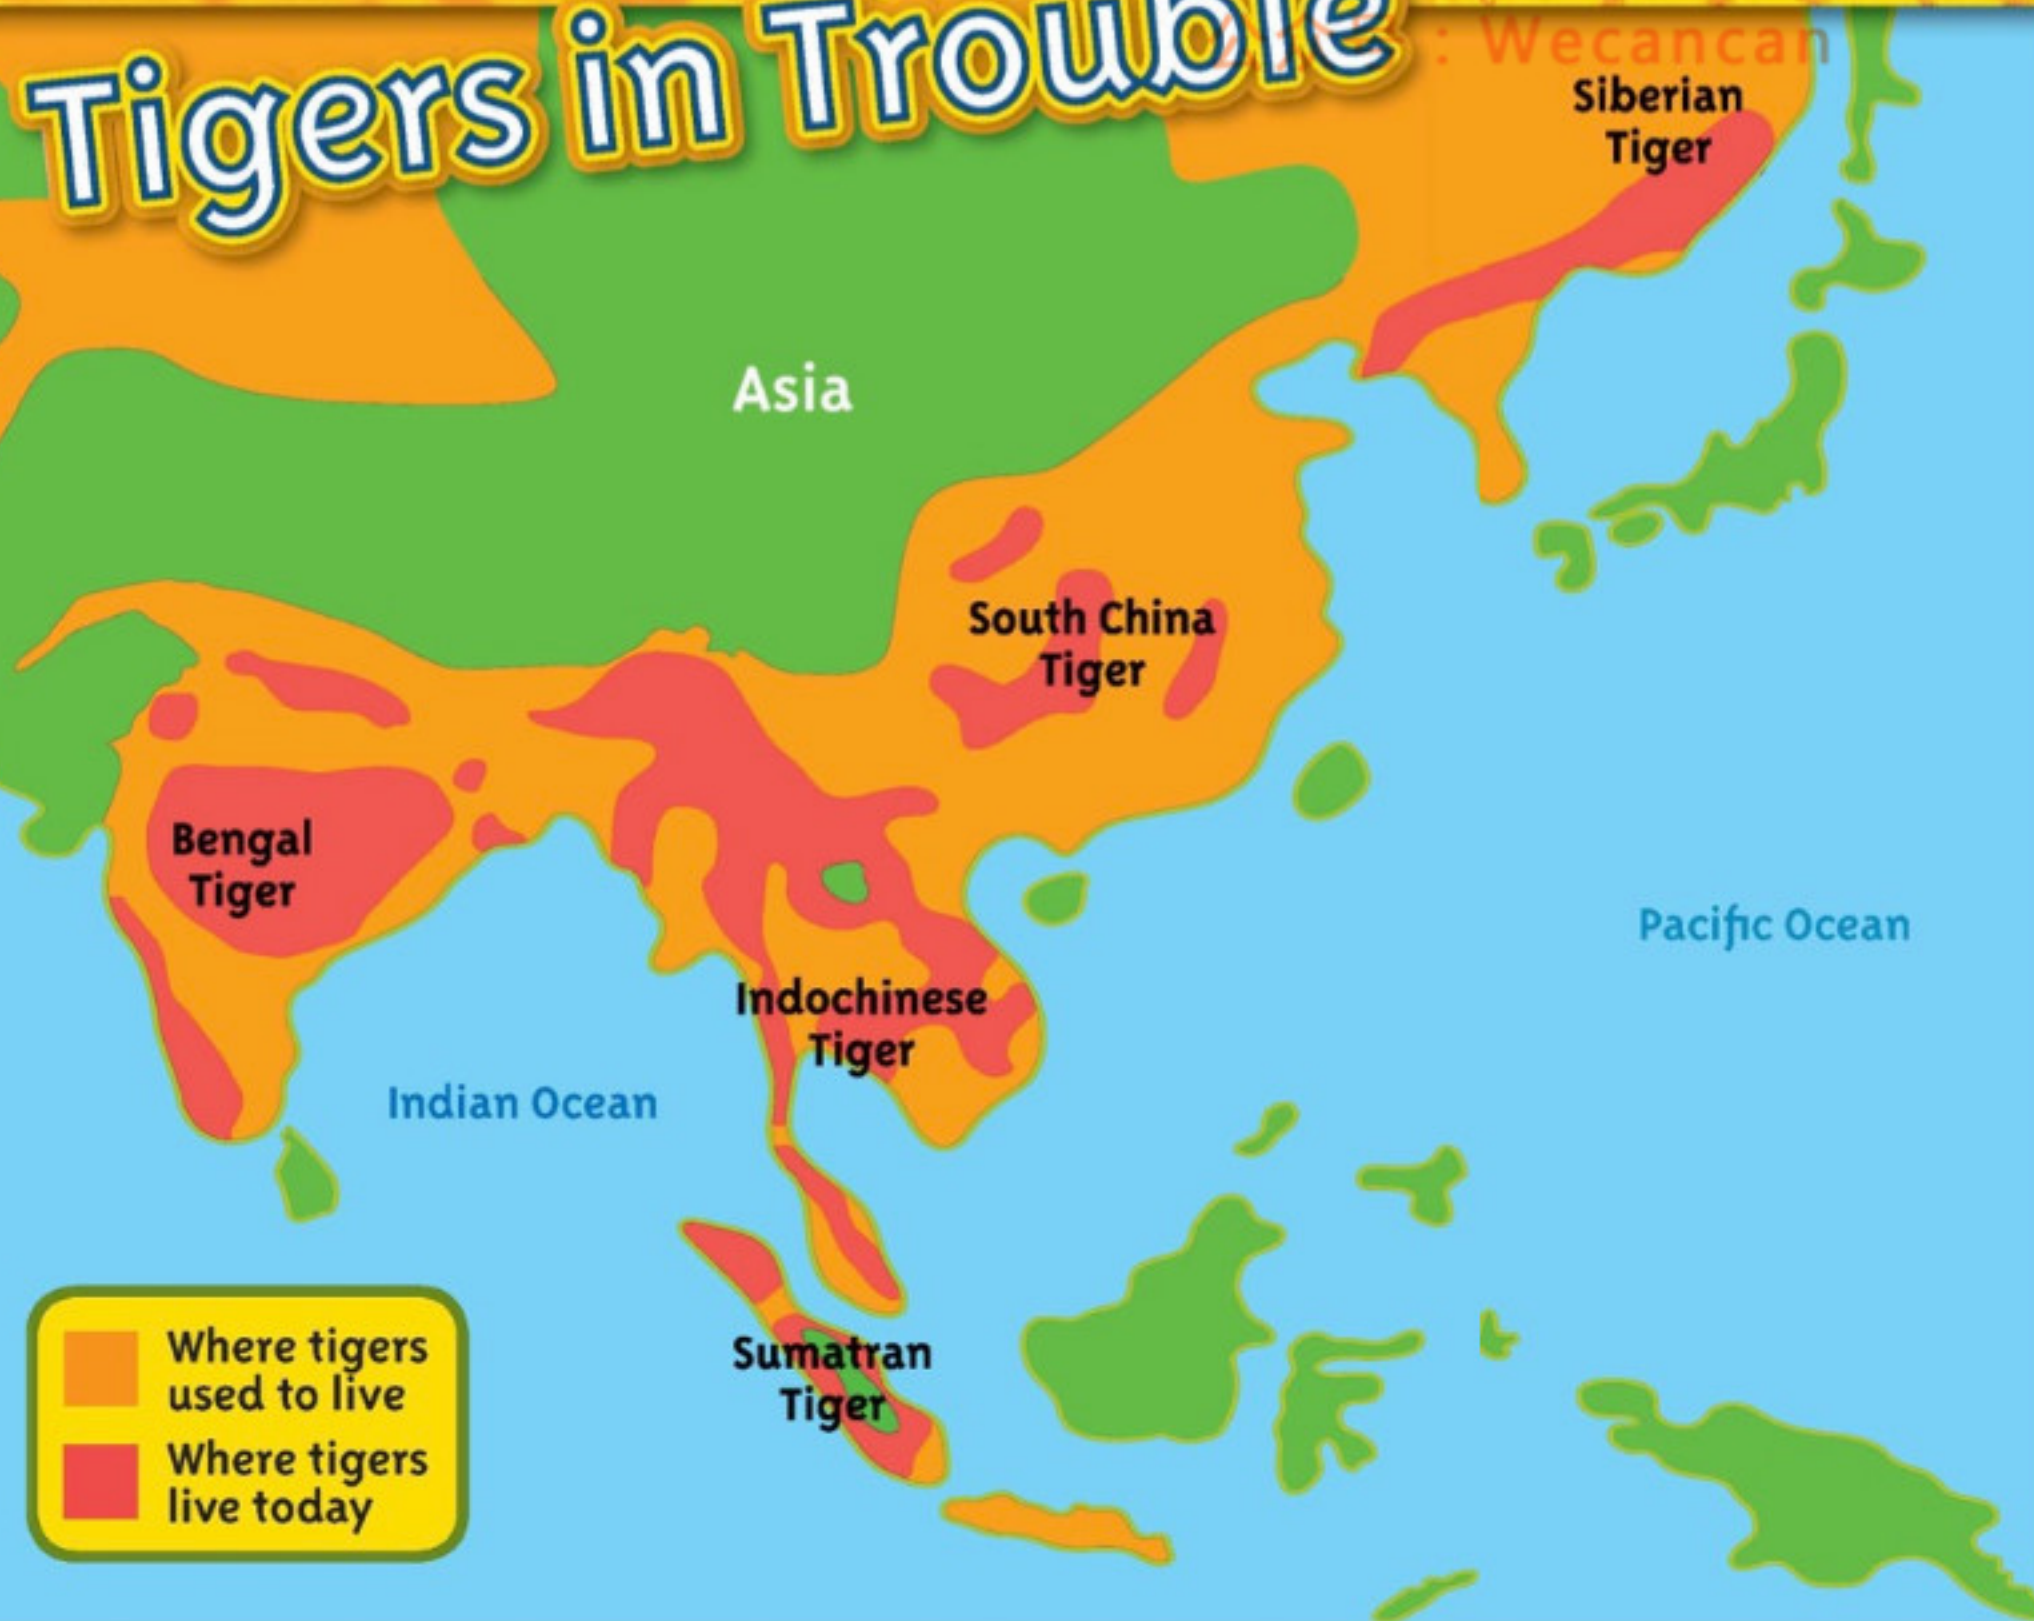

A tiger on a pogo stick!

A

White Bengal Tiger

Tigers in Trouble

There are five different kinds of tigers today. They are the Bengal (BEN-gol), South China, Indochinese (in-doh-chi-NEEZ), Sumatran (SOO-MAH-truhn), and Siberian (si-BEER-ee-uhn) tiger. Three other kinds of tigers have already become extinct.

Tigers are endangered. About 100 years ago, there were 100,000 tigers in the wild. Today there are less than 3,500.

Tiger Term

ENDANGERED: At risk of dying out

EXTINCT: A group of animals no longer living

Why are tigers disappearing?

Tigers are losing their habitat. People cut down trees. Tigers live and find food in the forests. When forests disappear, so do tigers.

People also kill tigers for their body parts. Their skins are used for rugs. Other parts are used to make traditional Chinese medicines.

Killing tigers is against the law. But it still happens today.

Tiger Term

HABITAT: The place where a plant or animal naturally lives

South China Tiger

Helping Tigers

Bengal Tiger

Wecanacan

Though tigers are in trouble, there is good news. New forest areas for tigers have been found. Also, people are planting trees where forests have been cut down.

You can help, too. Tell your family and friends about what you've learned. We can all work together to keep tigers on our planet!

Stump Your Parents

公众号：Wecan

Can your parents answer these questions about tigers?
You might know more than they do!

Answers at bottom of page 31.
